SOFTWARE ENGINEER | BACKEND | DISTRIBUTED SYSTEMS | CLOUD

Software Engineer (3 years' experience) focused on backend systems, distributed architectures, and cloud-native applications. Strong in designing and deploying scalable services using Java, Python, C++, C#, and JavaScript. Experienced in REST APIs, microservices, SQL systems, and production debugging across AWS-based environments with Docker and CI/CD pipelines.

EXPERIENCE

Software Engineer Intern — Centient1 | Remote | Jun 2025 – Jul 2025

- C, C++, C#, Java, Python, JavaScript (ES6+), SQL, Jira, PHP
 - Built backend AI services using Python and REST APIs
 - MLOps expertise: End-to-end ML pipelines (Azure ML, AWS SageMaker, MLflow), Docker, Kubernetes, CI/CD for ML.
 - LLMOps experience: Deploying open-source LLMs (Llama, Mistral, R1), optimizing LLM inference, RAG, fine-tuning.
 - Software engineering: Python, ML frameworks (PyTorch, TensorFlow), microservices, data pipelines.
 - Problem-solving: Evaluating and fine-tuning ML/LLM models, tracking metrics, optimizing AI solutions.
 - ChatGPT, AI/ML, Gemini, Copilot
 - AI Agentic, Lucid chat, Canva, word press, wix, Flipcause, HTML, CSS, Adobe Suite
 - Supported distributed system reliability and frameworks, integration, and monitoring
 - Implemented API testing, debugging, and production system validation
 - Developed GA4-based ETL pipeline for large-scale behavioral data
 - Applied regression models for forecasting and trend analysis
 - Built dashboards for data visualization and operational insights
-

Full-Stack Software Engineer — Teos Technology | Remote | Aug 2025 – Dec 2025

- REST APIs, Microservices, Distributed Systems, Node.js, .NET Core
 - Debugging, Monitoring, Logging, Incident Response, Reliability
 - Designed microservices using C# and Python in Docker environments
 - Built CI/CD pipelines with GitHub Actions for automated deployments
 - Improved observability via logging, monitoring, and tracing systems
 - Resolved production issues impacting latency and system reliability
 - Built React + Node.js full-stack application with REST APIs
 - Optimized distributed system performance and backend architecture
-

Security Software Engineer — I.R.D Business Group | Remote | Mar 2025 – Aug 2025

- AWS (EC2, S3, Lambda, IAM), Docker, GitHub Actions, CI/CD
 - IAM/RBAC, OWASP, Snyk, SonarQube
 - Integrated Snyk + SonarQube into CI/CD pipelines for security scanning
 - Performed IAM audits and RBAC access control enforcement
 - Built ETL pipelines for GA4 analytics and reporting systems
 - Supported production monitoring and anomaly detection workflows
 - Create and maintain project workflows, custom fields, screens, and permission schemes across all platforms
 - Build and customize dashboards and reports in both Jira and Confluence to meet team requirements
 - Assist with user administration across all platforms, including managing permissions and access controls
 - Improved system reliability through data modeling and observability
-

Full-Stack Developer — Global Citizens Circle | Remote | Mar 2023 – Dec 2024

- SQL (MySQL, PostgreSQL), MongoDB, ETL Pipelines, GA4 Analytics
 - Git, GitHub, Jira, Postman, VS Code, Visual Studio
 - Built full-stack applications using React and Node.js
 - Designed REST APIs and SQL/MongoDB backend systems
 - Refactored legacy JavaScript into modular ES6 architecture
 - Improved scalability and maintainability of backend services
-

IT Specialist — Clinton Elementary School | MA | Aug 2019 – Jun 2020

- Supported 300+ users with 99% system uptime
 - Managed 100+ endpoints (Windows, macOS, Linux, Chromebooks)
 - Resolved 200+ technical issues, reducing resolution time 30%
 - Administered Active Directory (RBAC) for 300+ accounts
 - Reduced network downtime through proactive diagnostics 25%
 - Troubleshoot platform-related issues and provide technical support to users
 - Help implement and maintain project tracking solutions
 - Participate in the evaluation and implementation of Atlassian apps and integrations
 - Support Agile teams by configuring and maintaining their project spaces
 - Document processes and maintain configuration documentation
-

EDUCATION

B.S. Computer Science (Software Engineering) Dec 2025

Southern New Hampshire University

Magna Cum Laude | GPA: 3.73 | Dean's List / President's List
